Objective

Junior Developer with 1.5 years of experience seeking an internship opportunity as a Full Stack Developer. Skilled in Java, Spring, React, Node and MySQL, with a strong focus on building interfaces, API's, developing systems, and delivering innovative solutions.

Skills

Proficient in Java, Spring, React, JavaScript, TypeScript, HTML, CSS, styled-components, Node.js, and MySQL. Strong understanding of software architecture and best practices, including Clean Code, SOLID principles, and Design Patterns. Experienced in version control, DevOps, and agile methodologies, working with Git, GitHub, Postman, Scrum, Kanban, Extreme Programming (XP), CI/CD, and software testing.

Intermediate English (B1).

Experience

Extension Project: Event Website – Full Stack (Sep 2024 – Nov 2024)

Designed the initial interface in Figma and implemented it using HTML, CSS, and JavaScript.
Developed the front-end with React and styled-components.
Set up the back-end with Node.js, Express, creating REST APIs for managing events, users, and access roles.
Integrated the CEP API for automatic address completion and the Imgur API for image uploads, streamlining the event creation process for users.

Extension Project: Automatic Feeding System - IoT (Mar 2024 - May 2024)

Developed the project code in C++, using the Telegram BOT API for remote manipulation.
Created the prototype with ESP-8266, a breadboard, a DC motor, and an H-bridge.
Integrated hardware and software components to create an automated feeding solution.

Education

Associate Degree in Systems Analysis and Development
FECAP - Fundação Escola de Comércio Álvares Penteado
March 2024 - December 2025
